Introduction

Background

The Fields of Normandy tries in vain to imagine just some of the horror faced by the 6th Royal Scots Fusiliers in Normandy in 1944 as part of Operation Epsom to seize the German-occupied city of Caen. The strain of battle was immense. They faced a near impossible task of advancing against an almost invisible enemy consisting of hidden machine guns, artillery and minefields.

In the game, you will be commanding small groups of soldiers from a platoon. A rifle squad consists of around a dozen privates and would usually include a corporal. There will also be Machine Gun Teams, PIAT Teams and Mortar Teams to command as the game progresses.

You are the platoon lieutenant (not represented on the game map) commanding these squads and teams.

I have been playing wargames for many years, mostly solitaire. I have tried to keep this book relatively accessible but not simple, so that it can help to attract new people to the hobby but still provide a challenge to more experienced gamers. It does not pretend to be entirely realistic, and some concepts have been simplified for gameplay purposes. The intention was to produce an accessible, fairly quick-playing but re-playable experience. I hope to produce more solitaire game books in the future. As an independent publisher, I have produced this book alone; I apologise for any mistakes that have escaped my thorough Scouting! Please enjoy the book and thank you for your purchase – it is much appreciated and the only way I can continue to develop new titles.

How the book works

This book is a solitaire wargame. You play the game, and the book will provide the “enemy”. You will need 2 standard six-sided dice to play. Methods to play the game include:

- Using the suggested counters at the end of the book, which you can cut out and stick to medium card.
- Photocopy and then draw/write on the pages lightly in pencil and erase when necessary. You can use any annotations you choose for the units. For example, for “Rifle Squad A” you could draw a soldier, a rifle, or simply write “A”.
- Lay the book flat and use cubes, miniatures, or similar tokens for the units.
- Use some kind of acetate and dry-wipe markers.
- Take a photo of the maps on a tablet and use the “edit” function to draw and erase. For example, on an iPad, tap “edit” in the Photos App and then tap the three dots in the circle and choose “mark-up”.

The book will take you through the general rules. It will explain the basics to allow you to play Missions 1 to 6. Once you are comfortable with those basics, it will then introduce more rules to allow you to play the longer, tougher missions later in the book.

Dan Goodpasture (Order #42211972)

Good luck, have fun, and always remember the men who had to do this for real and lost their lives in the process.

Rules

Overview

Each mission will provide a “win condition” which must be complied with in order to deem the mission a success. For example, Mission 1 requires you to reveal and clear the German unit. Always take careful note of the mission objective – you cannot succeed without it! You win as soon as you complete the win condition.

Mission Set Up

The first thing to do in each mission is to set up your own forces. Your units can be placed in any of the starting hexes on the map, which are the hexes marked with a black triangle pointing forwards. For example, in Mission 1, there is just the one starting hex and so both of your starting units need to be placed on that hex at the start of the mission. You can find the units which are available to you by checking the *6th Royal Scots Fusiliers* chart for each mission. Again, for Mission 1, you will see that you have 2 rifle squads – *Rifle Squad A* and *Rifle Squad B*. The only other thing you need to do at this stage is look carefully at the map and begin to determine what your tactics will be in order to achieve your objective, taking into account the position of potential enemies and the terrain.

The Maps

Each map consists of a series of hexes which your units can advance through, and on which will appear German units. Some hexes have terrain features such as woods, buildings and hills. These features look like and have the effect noted in the table below. The “To Hit” value is the number required from rolling 2 six-sided dice in order to hit the targeted enemy unit. The lower the number, the easier it will be to hit that target unit. Terrain can make it easier or harder.

Terrain Feature	Graphic	Effect
Woods		Attacking into a hex with Woods adds **+1** to the To Hit value
Building		Attacking into a hex with a Building adds **+2** to the To Hit value
Hill		Attacking *from* a Hill hex deducts **-1** from the To Hit value (*not for Grenade Attacks*)
Clear (no terrain)		None
River		Units cannot cross Rivers (other than at bridges)

There are also question marks on some hexes (“?”). These hexes are where there have been reports of recent enemy activity. It will often be necessary to scout these hexes and destroy any German units in order to achieve your mission objectives.

Dan Goodpasture (Order #42211972)

The Turn Tracker

Beneath the map you will find the Turn Tracker. Place an “X” in each section as you proceed through the turns. The first turn for each mission will have an “X” already placed to signify that you are about to take your first turn. Once you place an “X” in the final section of the Turn Tracker and then complete that turn, the mission comes to an end. If you have not achieved the win condition by then, you lose. You will see that in Mission 1 you have 4 turns to achieve your objective.

The Turn Process

The game proceeds through each turn as follows:

1. The player marks off the next section of the Turn Tracker to signify that a new turn is beginning. This has already been done for Turn 1.
2. The player selects a unit to activate first, and then rolls 2 dice. If a double is rolled, the player may opt to keep it and select the Orders that relate to the number shown. Alternatively, the player may opt to re-roll *both* dice. This can be repeated any number of times as long as another double is rolled. Then, to determine which Orders are available to that unit for the turn, check the 2 dice results (or, in the case of a “kept” double, 1 die result) against the Orders Chart for the mission.
3. The player then selects which Orders to apply to the unit from the Order Chart. This is found on the mission details page for each mission. Players generally have a range of potential orders to choose from, including “Advance”, “Fire”, “Grenade Attack”, “Take Cover”, “Rally” and “Scout”. Each order has a dedicated dice roll allocated to it which is set out in the chart for the particular unit you have selected.
   Example 1: a roll of double 3 in Mission 1 would allow the player to either select the “Advance” and “Take Cover” Orders, or re-roll both dice and take their chances that more useful Orders will come up.
   Example 2: a roll of 3 and 6 in Mission 1 would allow the player to select either the “Advance” and “Take Cover” Orders or the “Advance” and “Fire” Orders. Note that for each unit the player can only choose the result of 1 of the dice (including on a double) – the other die is discarded. The player may choose to discard both dice, in which case the unit does nothing for that turn. Once a die has been chosen, a *unit with Normal morale* can carry out either or both of the Orders noted next to the die roll which was chosen by the player. If both Orders are carried out, the first Order must be completed first, and then the second Order. For example, if the player in Mission 1 chooses to keep the roll of 6 (Advance and Fire), then the unit can either (i) Advance, or (ii) Fire, or (iii) Advance and then Fire (it could not Fire then Advance under these Orders). A *unit with Low morale* can only carry out the first Order listed (or do nothing). (See “Morale” below). *Orders* are described in more detail below. After activating a unit, repeat steps 2 and 3 until all British units have activated.

4. After the British have activated, each German unit activates in the order chosen by the player. On its activation, a German unit will Fire at each and every British

Dan Goodpasture (Order #42211972)

unit adjacent to it, which is in the German unit's Fire Zone (British units do not have Fire Zones). A German unit's Fire Zone consists of the hex towards which it is facing and the two hexes either side of that hex (all being adjacent to the unit). See *Fig 2* below.

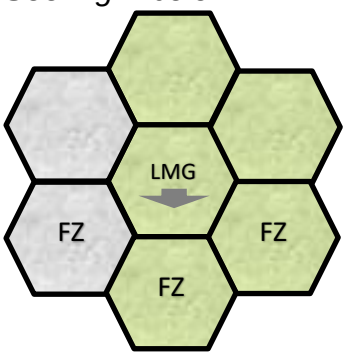

Fig 2. As the German LMG is facing downwards, its Fire Zone will consist of the 3 hexes marked 'FZ'. If it were on the left edge of the map (i.e., assuming the 2 shaded hexes were not there) and facing downwards, its Fire Zone would only consist of 2 hexes – the 2 unshaded 'FZ' hexes.

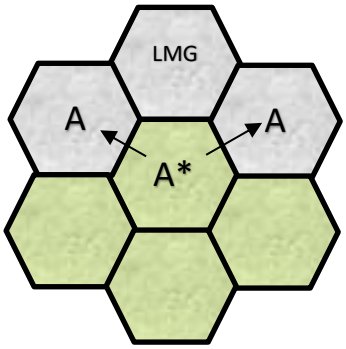
A successful hit by a German unit will result in the British unit suffering a loss of morale. If the British unit already had Low morale, then it is removed from the game.

The Orders

Advance (ADV) – The ordered unit can Advance 1 hex but must move to a hex which is forward (up the map) of its current hex (*Fig 3)*. British units *can* enter hexes with other British units in them (no limit applies). *Note, however, that British units cannot enter hexes that contain German units.*



Unit A could normally advance to any of the three shaded hexes. It cannot move backwards. Here, it cannot move into the hex with the German LMG until that unit has been destroyed.

Fig 3 – Example of an "Advance" Order

As soon as a unit enters a hex which is adjacent to a "?", it will reveal any potential enemies hiding there. Mark the "?" (or remove the "?" counter if using counters) to remind you that it has been resolved. See "Revealing Enemy Units and German Fire Zones" below. Note that this applies even if two actions are being taken under the current Order. For example, if the Order is "Advance" then "Fire", German units may be revealed after the Advance Order, and then Fired upon in the second Order.

Fire (FIRE) – The ordered unit can Fire at 1 revealed German unit in an adjacent hex. 2d6 are rolled (2 six-sided dice). Check the "To Hit" value of the *weapon being fired*. For example, the Rifles in Mission 1 hit on an 8+. That means that the player needs to roll 8 or higher with the 2 dice to hit the target. Before rolling, note the modifiers that apply to this value based on the terrain and other situational information – see the "Terrain or Situation" Chart for the mission, and "The Maps" above. For example, in Mission 1, if Rifle Squad A Fires at a German unit which is in

Dan Goodpasture (Order #42211972)

the Woods, then they would need a 9 or higher to hit (8+ for the Rifles, +1 for the target's Woods bonus). If they had managed to flank the German unit and Fire from outside that unit's Fire Zone, then they would need an 8 or higher to hit (8+ for the Rifles, +1 for the Woods and -1 for flanking the target).

One successful hit results in the German target unit being removed from play.

Grenade Attack (GRE) – The ordered unit can make 1 Grenade Attack against a German unit in an adjacent hex. The Attack is performed exactly as above, but note that the "To Hit" value for a Grenade Attack is *always* 6+. *No modifiers are applied to a Grenade Attack, so no Flanking, Support, Mortar or Terrain bonuses apply for either side.*

Take Cover (COV) – The ordered unit will take Cover. This will add +1 to the To Hit value of any enemy attack which targets this unit until it moves hexes. Underline the unit to show it has found Cover. Units in Cover can take Cover again, in which case underline the unit a second time – this adds another +1 to the To Hit value of any enemy attack. There is no limit to the amount of Cover a unit can get in this way, but as soon as the unit Advances out of the hex, it loses all of that Cover (which is cleared from the map). Cover bonuses are in addition to any provided by the hex itself. For example, a unit that takes Cover once in the Woods will accrue a +2 bonus (+1 for the Woods and +1 for the Cover) on any attempt by the enemy to Hit it.

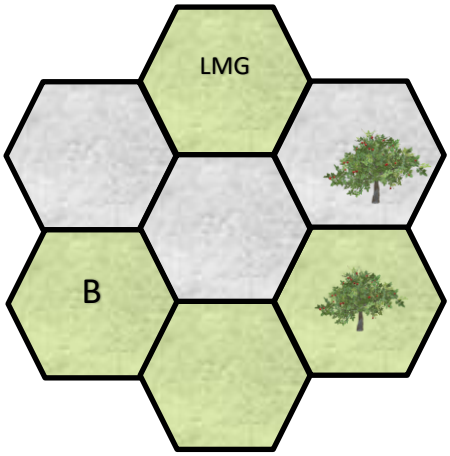
Rally (RAL) – The ordered unit's morale will go back to Normal (see "Morale" below). This Order would be wasted on units with Normal morale.

A Low morale unit which Rallies does not, on that Turn, get to perform the second Order. It was Low morale when ordered, so at that stage can only perform the one Order. On its next Turn, assuming it is still at Normal morale, it can perform both Orders from its chosen dice roll as usual.

Scout (SCO) – The ordered unit can reveal 1 enemy position ("?") which is *exactly 2 hexes* away from the unit. When a German unit is revealed in this way, the player selects the facing of the German unit and therefore its Fire Zone. However, when revealed using the Scout Order, this must always be one of the 3 downward facing edges of the hex and *never* facing off-map. The player therefore has a choice of 3 facings for a unit on a central hex, but only 2 for a unit on one edge of the map (see "Revealing Enemy Units and German Fire Zones" below). This choice of facing is to reflect the tactical advantage that Scouting can give to an attacking force.

Dan Goodpasture (Order #42211972)

Fig 4 – the Scouting Order



Rifle Squad B has Scouted the enemy position 2 hexes away to reveal a German LMG. The player can select the facing of the LMG but it must be towards one of the shaded hexes. It would make sense to face the LMG towards the Woods hex to allow the Rifle Squad to move forward into a Flanking position to the left. If the LMG were on the right hand edge of the map (so that the 2 Woods hexes were not there), it could only be placed facing one of the other 2 shaded hexes (not facing "off the map").

Morale

Morale is a key component in the game and Low morale will make missions far harder to complete within the timescales permitted. Morale in *The Fields of Normandy* is there to represent the fact that soldiers suffer mentally in war as they face constant bombardment and tire, and as they, their friends, and colleagues are killed and wounded in battle.

When a *British* unit with "Normal" morale suffers a successful attack, place an "X" or other mark next to the unit to indicate it has "Low" morale. All units start with "Normal" morale (as good as can be expected in the circumstances). On a hit it drops to Low. If a unit with Low morale is hit, it is removed from the battlefield. This reflects deaths, wounds and a general inability to continue. The "Rally" Order (see above) can increase the morale of a Low morale unit back to Normal, which reflects natural recovery, good leadership and perhaps reinforcements.

The consequence of Low morale is that units will become less effective. A unit with Low morale can only carry out the Order in the *first* column of the Order Chart for its chosen dice roll. You can no doubt see the effect this will have on how efficiently you can order your units to carry out your plans.

British Fire Zones

Note that Fire Zones only apply to German units. British units can fire into any adjacent hex, including backwards (although they can only fire at 1 German unit for each "Fire" Order performed). For German Fire Zones, see Step 4 of "The Turn Process" above.

Revealing Enemy Units and German Fire Zones

These appear on hexes marked with a "?" and are revealed as soon as any British unit Advances onto *any* adjacent hex. More than one German unit can be revealed if a unit Advances so that it is adjacent to more than one "?". Be careful!

They can also appear when the hex is Scouted (see "Scout" under "The Orders" above).

Dan Goodpasture (Order #42211972)

When either of these things happen, roll on the Enemy Unit Chart for the mission to see which unit appears in the hex. German units will stay where they appear (they are “dug in” and are defending the area from the Allied advance). Note that in later missions Minefields can appear instead of units (see “Minefields” below).

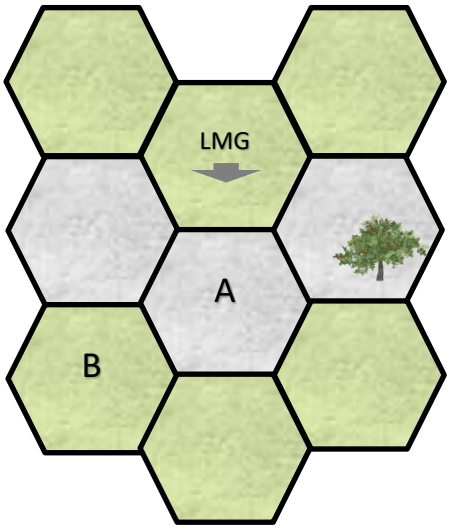
New German units are always placed facing the unit that revealed them – the unit’s Fire Zone is thereby established. This can be an important tactical consideration when deciding when and where to Advance towards German positions in order to create Flanking opportunities (see “Flanking and Support” below). Note the facing can be chosen when the unit has been scouted (see “Scout” under “The Orders” above).

Summary of German unit revelation:

- Advance a unit so that it is adjacent to a “?” hex <u>or</u> Scout a hex from exactly 2 hexes away using the Scout Order.

- Roll on the Enemy Chart and place it into the hex, clearly indicating its facing. If revealed by moving adjacent to it, the German unit will face the British unit that found it. If the German unit has been Scouted, then the player may select any facing, as long as it is 1 of the 3 downward positions *and* not facing directly off-map. See *Fig 5.*

- Minefields (fully explained below under “Minefields”) are also placed into the hex if revealed instead of a German unit. In that case, if “found” by a British unit, the Minefield must instantly test for a hit. Roll 2 six-sided dice: a roll of 7+ will inflict 1 hit on the unit – a “Normal” morale unit will become Low morale and a Low morale unit will be removed from play. Note – no defensive bonuses apply to Mine attacks. If the Minefield was Scouted, then no instant Hit test is needed.



The LMG has been revealed and its facing clearly marked. Unit A should perhaps have approached from the Woods for more cover. If unit B had scouted the position before A arrived, then the player could have chosen its facing but, in that case, it would have to have been placed facing towards one of the 3 shaded positions (downwards). Facing the Woods might have allowed B to move in to Flank it from the left.

Fig 5 – The Facing of a German Light Machine Gun

Dan Goodpasture (Order #42211972)

Flanking and Support (do not apply to Grenade Attacks)

Flanking and Support are key military tactics and very useful in this game. There are 2 potential bonuses available *only to British units*:

1. If a British unit Fires at a German unit from outside the German unit's Fire Zone, then the British unit receives a -1 bonus to the "To Hit" value of the weapon used. For example, a Rifle Squad usually hits on a roll of 8+, but if it manages to Flank the enemy and Fire from outside the enemy's Fire Zone, the Rifle Squad would only need a 7+. You will see later that German Artillery does not have a Fire Zone and so cannot be Flanked in this way.
2. When a British unit Fires at a German unit from any direction, it receives a -1 bonus to the "To Hit" value of the weapon used for *each* other British unit which is adjacent to the target German unit (and therefore deemed to be supporting the attack). It does not matter whether these other units are in the target's Fire Zone or not – they may even be in the same hex as each other or as the main Firing unit – the bonus still applies. For example, Rifle Squad A Fires at a German target needing 8+ to hit. If there is another British unit in the Rifle Squad's hex, and another unit in a different hex but still adjacent to the target, then the Rifle Squad would only need a 6+ to hit as it would receive a -1 bonus for each of the other 2 supporting units. Note that adjacent Mortars still provide this -1 bonus, despite their differing operation (see "Mortars" below).

You are now in a position to play Missions 1 to 6, so feel free to jump in before reading further. There is a useful Player Aid on page 18.

Mortars

Mortars are supporting units which cannot themselves Fire directly at German units (although they are fired upon by German units in the usual way).

Instead, Mortars provide a -2 bonus to the "To Hit" value of *any* British unit *if the Mortar is exactly 2 hexes away from the target German unit being fired upon* by the British unit. Mortars accrue bonuses in the usual way, so that a Mortar which is on a Hill, for example, would provide a -3 bonus to relevant British units. See *Fig 6.*

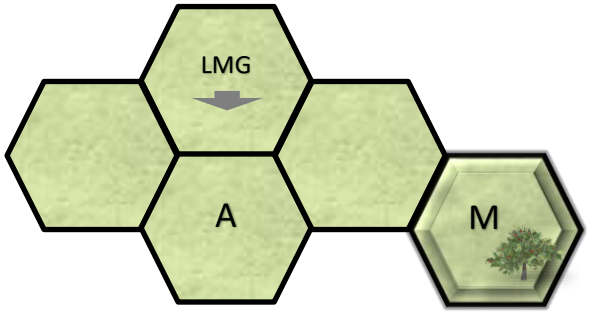


Fig 6 – Mortar Support

Mortar Team M is in a good position: on the Hill and in Woods. When Rifle Squad A Fires on the German LMG, it will need a 5+ to Hit (rather than the usual 8+) as the Mortar Team provide a -3 bonus (-2 as usual, and -1 for being on a Hill).

The standard Mortar bonus is always -2, regardless of the direction of the Mortar in relation to its Target.

Dan Goodpasture (Order #42211972)

Mortars get the Hill bonus even if the Target is also on a Hill (Hills are never adjacent to another Hill and so this only applies to Mortars which, as described above, can support a British unit firing at a Target 2 hexes away from the mortar).

Mortars can also provide the usual -1 support bonus if they are adjacent to the Target of another British unit (see “Flanking and Support” above). However, from a tactical point of view, it is often better to keep Mortars out of line of enemy fire.

Half-Tracks

Half-Tracks are German units which have two wheels at the front to aid steering and tracks on the back to aid traction; they are easier to drive than tanks. They are commonly armed with mounted machine guns.

Half-Tracks will be revealed at the start of a mission in clear Terrain; they do not need to be found or Scouted. Their facing is already indicated on the map.

The key thing to remember for Half-Tracks is that they can only be Hit by a PIAT Team (see below). However, other British units can support that attack in the usual way, including the Mortar using its normal rules.

PIAT Teams

PIATs (Projector, Infantry Anti-Tank weapon) are portable anti-tank weapons.

The key thing to remember for PIAT Teams is that they can only Fire at Half-Tracks and units in Building hexes. When firing at a Building, the +2 cover provided by the Building is ignored.

PIATs benefit from all usual bonuses, including Mortar, Hill, Building, Woods, Support and Flanking bonuses (including against Half-Tracks). Although other units cannot themselves Fire at Half-Tracks, the bonuses given for Flanking and Support reflect the chaos that other units could cause for the troops inside the Half-Track, leaving it more vulnerable to the PIAT attack.

Minefields

From Mission 7 onwards, Minefields might appear. They will be found in the Enemy Unit chart. If a “?” is resolved by the player and a Minefield is rolled as the enemy, then instead of a German unit, a Minefield is placed in the relevant hex. Minefields are placed into the hex in the usual way and cannot be removed.

If “found” by a British unit in the usual way, by advancing to an adjacent hex, the unit must instantly test for a hit from the Minefield. The unit is deemed to have wandered into the edge of the Minefield without realising it (although it does not actually move there). Roll 2 six-sided dice: a roll of 7+ will inflict 1 Hit on the unit – a Normal morale unit will become Low morale and a Low morale unit will be removed from play.

Note: *No bonuses apply to Minefield attacks – the roll is always for a 7+.*

Note: *If the Minefield was Scouted, then no instant Hit test is needed.*

Dan Goodpasture (Order #42211972)

Minefields can be entered by British units (although this should probably be a last resort). For the remainder of the mission, any unit which is *in* a Minefield hex during the German activation section of the turn will face a test for a hit in the same way as described above. The “7+” test is denoted in the Enemy Unit Chart as a reminder. Again, no bonuses apply – Minefields always Hit on a 7+.

Artillery

Some of the later missions include German Artillery units (ART). Like Half-Tracks, they will start the mission as revealed units and always in clear Terrain. They do not have a “Facing” as such (and so cannot be “Flanked”). In each German activation section of each Turn, an Artillery unit will Fire at every British unit which is not in some kind of cover. In other words, it will Fire at every British unit which is not either in Woods, in a Building, or has performed a “Take Cover” Order. The “To Hit” value for an Artillery attack is 10+. Roll separately for each affected target unit. Artillery is destroyed in the same way as other German units, by any British unit.

Rivers

Rivers simply block movement between hexes which are divided by the River – they have no other effect. Bridges allow units to cross Rivers and are clearly marked on relevant maps. Units can therefore Fire across Rivers as usual.

Adjusting the Difficulty

If you find any particular mission too easy, or would just like a tougher challenge, simply reduce the number of Turns available to complete the mission by crossing out the final section of the Turn Tracker. Conversely, if it is too hard, then add an additional Turn to the Tracker.

Dan Goodpasture (Order #2211972)

Player Aid Overview

1. **Place your units in the starting hex(es) marked with a black triangle**
2. **Mark an "X" in the next Turn Tracker section (not on the first turn)**
3. **Select each unit in turn - roll 2d6 - select 1 result**
   (If a double is rolled, re-roll both dice if desired)
   - Perform either or both of the Orders listed in the Orders Chart for the unit. If both are performed, perform the first column Order first, then the second. **Low morale** units only perform the Order in the first column.
   - **Advance**: Move 1 hex forward (upwards) of current hex – test for and reveal German units in adjacent hexes:
     i. Roll on the Enemy Chart to determine which German unit appears.
     ii. Place the unit with its correct facing (towards the "finder" unit).
     iii. Minefields attack immediately if "found" rather than "Scouted" (no defence bonuses apply).
   - **Fire**: Fire at 1 adjacent German unit in any direction – check attacker's weapon's "To Hit" value. Roll that value or higher on 2d6 to succeed (modify the "To Hit" value in accordance with the "Terrain or Situation" Chart). Remove any German units that are Hit.
   - **Grenade Attack**: *Always* a 6+ To Hit – *no* bonuses apply from either side.
   - **Cover**: Add 1 Cover mark to the unit (+1 To Hit it).
   - **Rally**: Remove the Low morale marker from the unit.
   - **Scout**: Reveal 1 enemy position 2 hexes away from the Scouting unit. Choose its facing which must be down the map and not facing an edge.
4. **Activate any revealed German units**
   - In any order, all German units will fire at all British units in their Fire Zones.
   - Artillery will fire at *every* British unit not in some kind of defensive Cover.
   - All Terrain and Cover bonuses apply as normal, but German units do *not* benefit from any flanking bonus (British units have no facing) or bonuses from additional adjacent units.
   - Minefields attack any unit inside them – no defence bonuses apply.
   - Successful hits result in a loss of morale or, if the unit is already at Low morale, the removal of the unit from the game.
5. **Check for win condition if Turn Tracker is full, otherwise back to Step 2.**

Dice % Chance	**3+**	97%	**5+**	83%	**7+**	58%	**9+**	28%	**11+**	8%
	4+	92%	**6+**	72%	**8+**	42%	**10+**	17%	**12+**	3%

Dan Goodpasture (Order #42211972)

THE MISSIONS

Dan Goodpasture (Order #42211972)

Mission 1 – Secure the Woods (1)

A nice, easy, introductory mission to help you to see how the game works. Remember – cover and flanking are your best friends! The German unit which will be revealed is in a Woods hex and therefore receives a +1 defensive bonus when you try to Fire at it.

6th Royal Scots Fusiliers		
Squad	**Weapons**	**To Hit**
Rifle Squad A	Rifles & Grenades	8+ / 6+ (no bonuses)
Rifle Squad B	Rifles & Grenades	8+ / 6+ (no bonuses)

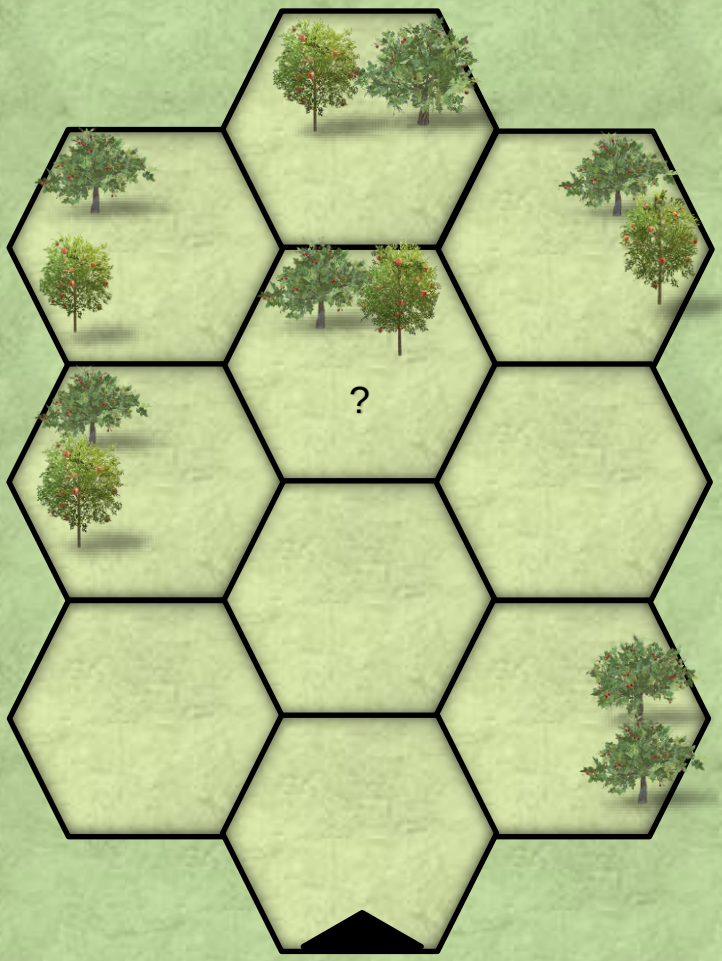
d6 Roll	Enemy unit revealed	To Hit
1-2	Heavy machine gun	5+
3-6	Light machine gun	6+

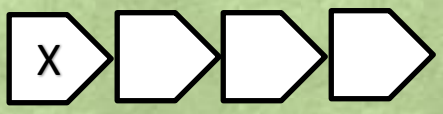
Terrain or Situation	To Hit value
Any unit defending in Woods	+1
British unit firing from outside German target's fire zone	-1
For each other **British** unit adjacent to a German target	-1

British Orders Chart								
d6	**Rifle Squad**							
1	RAL	GRE						
2	ADV	SCO						
3	ADV	COV						
4	FIRE	COV						
5	FIRE	ADV						
6	ADV	FIRE						

To Win: Reveal and clear the German unit before time runs out.

Dan Goodpasture (Order #42211972)





TURN TRACKER (1-4)

Dan Goodpasture (Order #42211972)

Mission 2 – Secure the Woods (2)

Mission 2 allows you to have another go in circumstances similar to Mission 1. Remember – Cover and Flanking…

6th Royal Scots Fusiliers		
Squad	**Weapons**	**To Hit**
Rifle Squad A	Rifles & Grenades	8+ / 6+ (no bonuses)
Rifle Squad B	Rifles & Grenades	8+ / 6+ (no bonuses)

d6 Roll	Enemy unit	To Hit
1-2	Heavy machine gun	5+
3-6	Light machine gun	6+

Terrain or Situation	To Hit value
Any unit defending in Woods	+1
British unit firing from outside German target's fire zone	-1
For each other **British** unit adjacent to a German target	-1

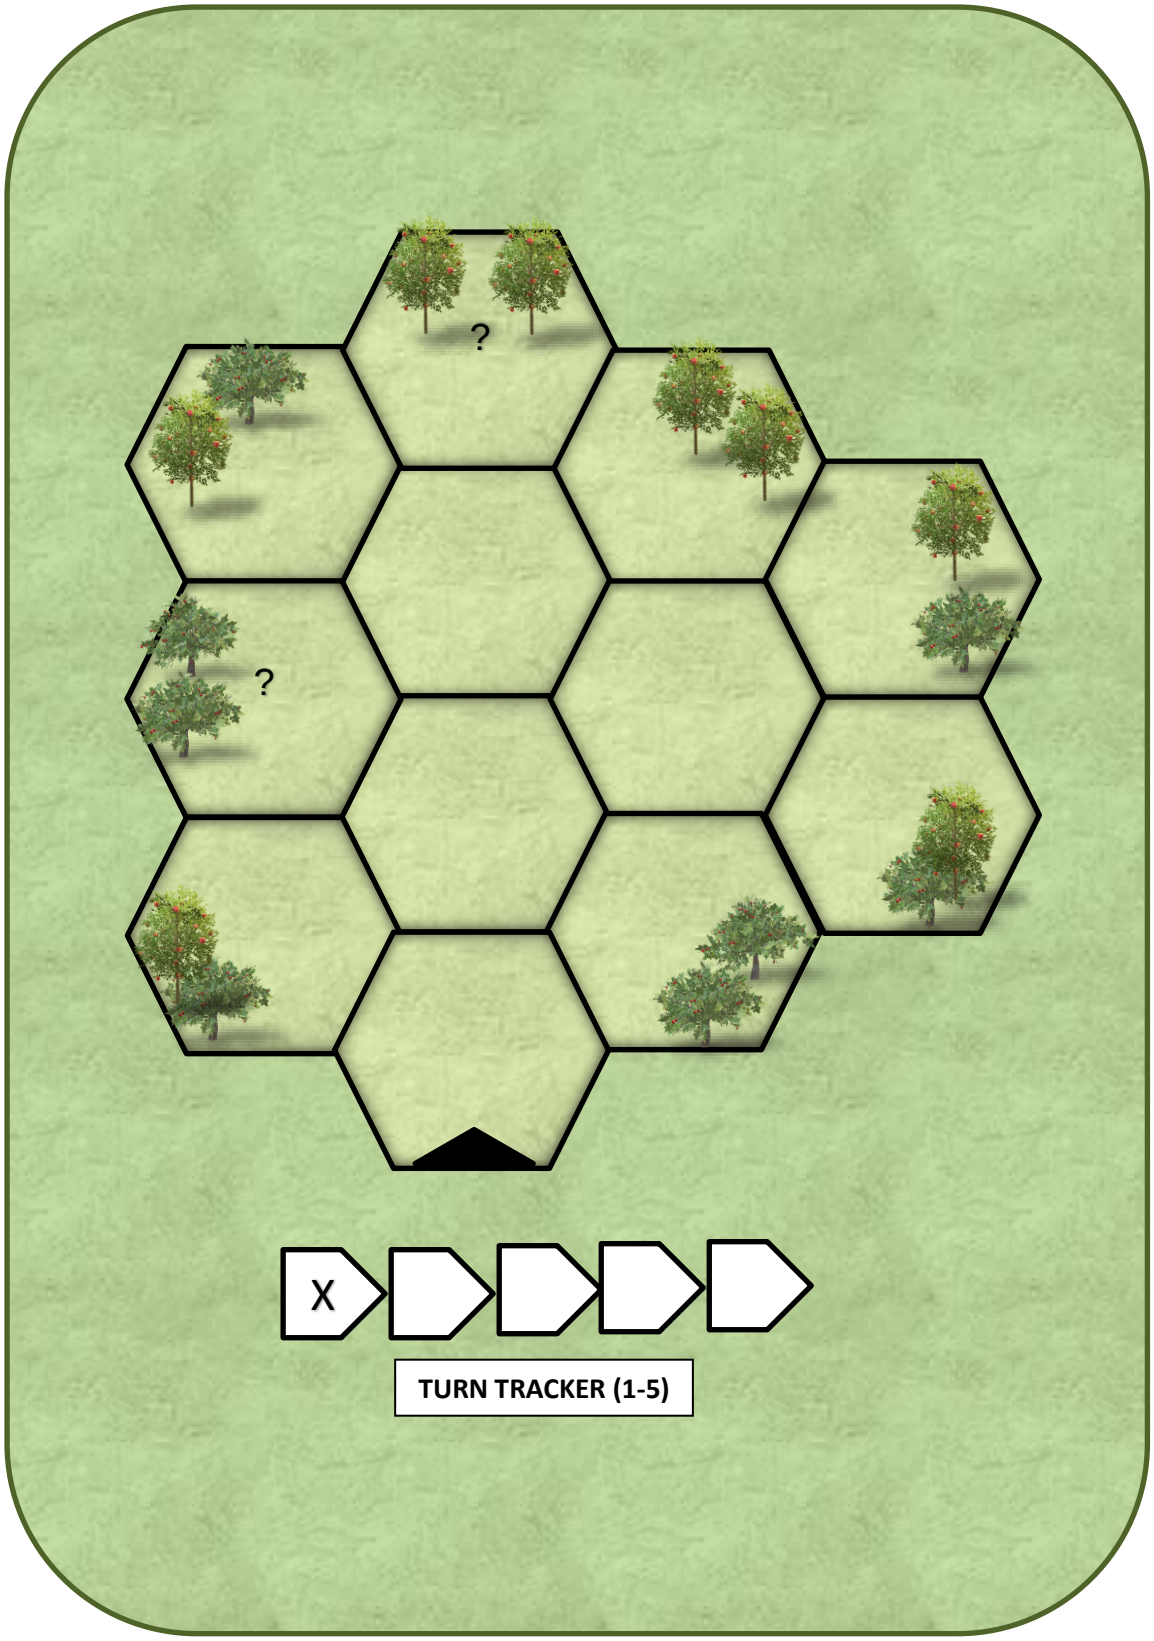
d6	**Rifle Squad**							
1	RAL	GRE						
2	ADV	SCO						
3	ADV	COV						
4	FIRE	COV						
5	FIRE	ADV						
6	ADV	FIRE						

To Win: Reveal and clear all German units before time runs out.

Dan Goodpasture (Order #42211972)



Dan Goodpasture (Order #42211972)

Mission 3 – Secure the Building

The building in this mission could be a problem, but there are useful Hills right next to it, one of which is Wooded and attracts bonuses for both attack (Hill) and defence (Woods). This would be even more useful if it was in the German unit's flank! German units in a Building act in the same way as other German units; when discovered they will face the unit that found them, and their Fire Zone works in the same way. This mission also introduces German Rifle Squads, which are a little easier to deal with than the LMGs and HMGs you have faced so far.

6th Royal Scots Fusiliers		
Squad	**Weapons**	**To Hit**
Rifle Squad A	Rifles & Grenades	8+ / 6+ (no bonuses)
Rifle Squad B	Rifles & Grenades	8+ / 6+ (no bonuses)
Rifle Squad C	Rifles & Grenades	8+ / 6+ (no bonuses)

d6 Roll	Enemy unit	To Hit
1-2	Heavy machine gun	5+
3-4	Light machine gun	6+
5-6	German Rifle Squad	8+

Terrain or Situation	To Hit value
Any unit defending in Woods	+1
Any unit defending in a Building	+2
Any unit attacking from a Hill	-1
British unit firing from outside German target's fire zone	-1
For each other **British** unit adjacent to a German target	-1

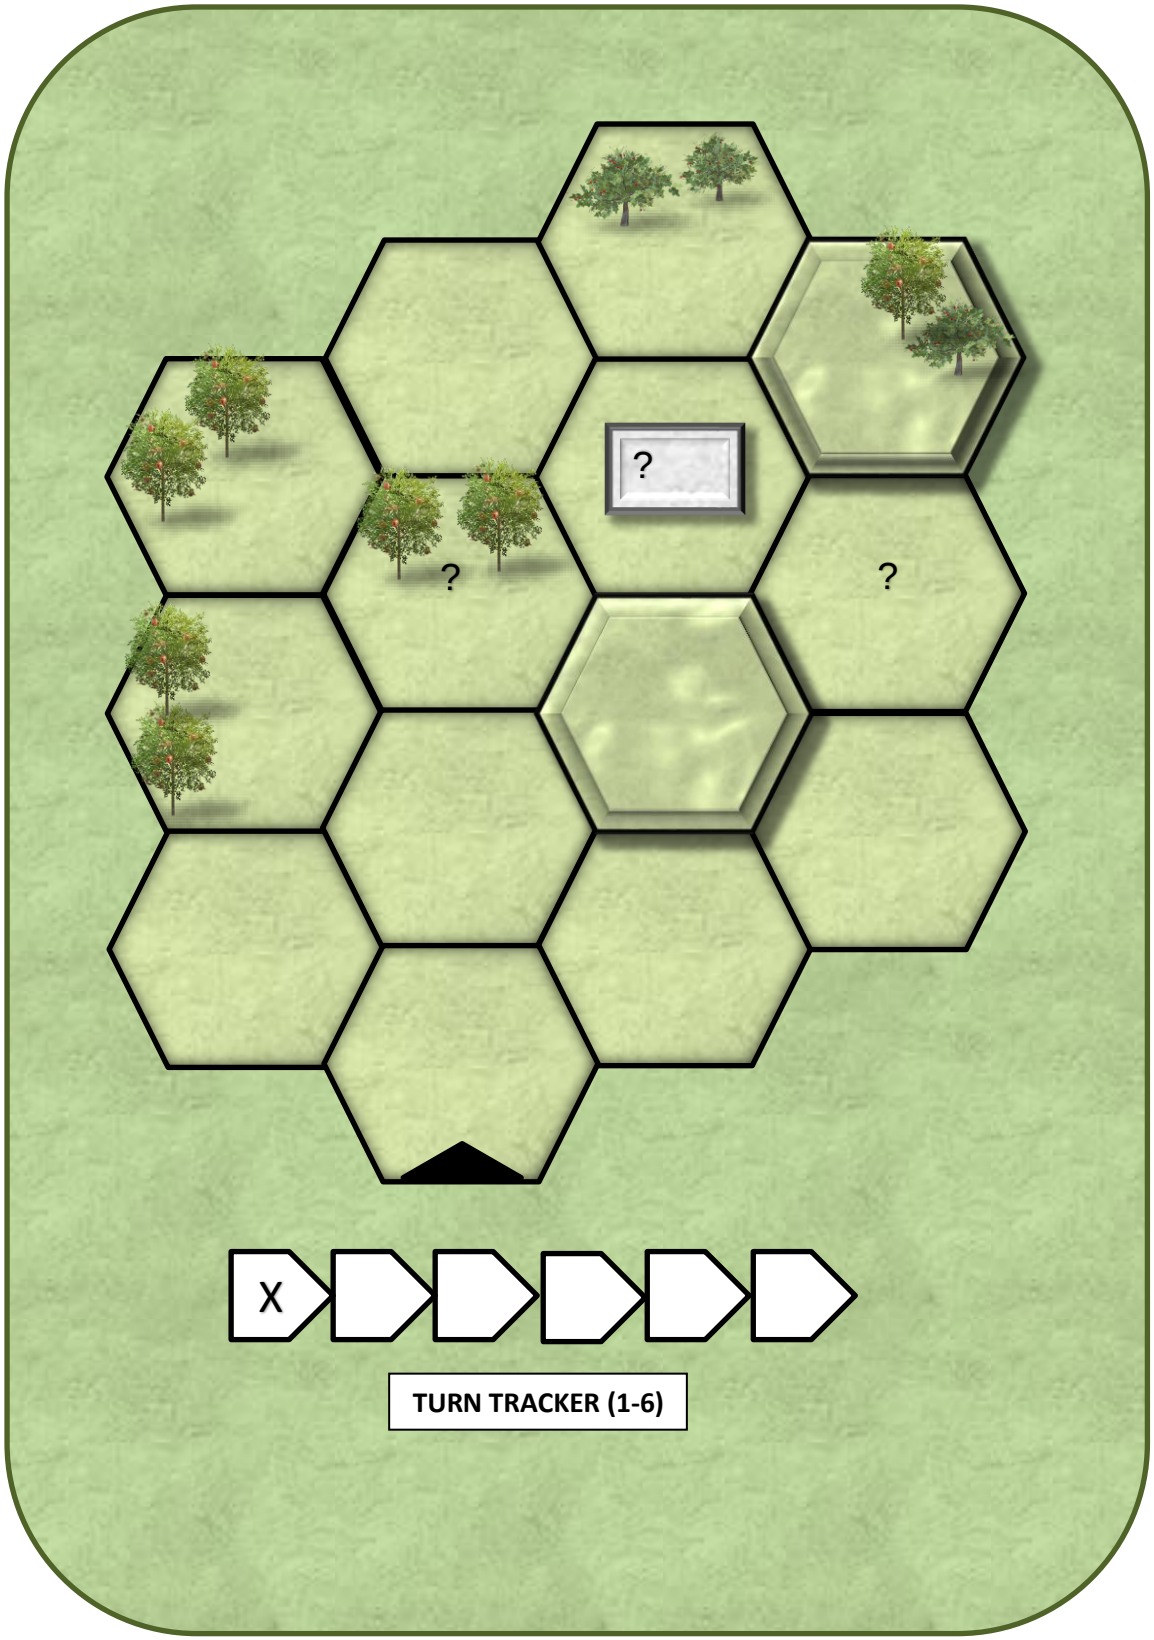
d6	**Rifle Squad**							
1	RAL	GRE						
2	ADV	SCO						
3	ADV	COV						
4	FIRE	COV						
5	FIRE	ADV						
6	ADV	FIRE						

To Win: Reveal and clear all German units before time runs out.

Dan Goodpasture (Order #42211972)



Dan Goodpasture (Order #2211972)

Mission 5 – Secure the Area (1)

Time to introduce more British fire power into the game. The next couple of missions will introduce British Machine Gun Teams. Note that they have a different shooting statistic (they hit on a basic 6+) and they have their own section in the Orders Chart (basically, they are less mobile than Rifle Squads and prefer to find better Cover. Also, they cannot Scout enemy positions).

6th Royal Scots Fusiliers		
Squad	**Weapons**	**To Hit**
Rifle Squad A	Rifles & Grenades	8+ / 6+ (no bonuses)
Rifle Squad B	Rifles & Grenades	8+ / 6+ (no bonuses)
LMG Team G	Machine Gun	6+

d6 Roll	Enemy unit	To Hit
1-2	Heavy machine gun	5+
3-4	Light machine gun	6+
5-6	German Rifle Squad	8+

Terrain or Situation	To Hit value
Any unit defending in Woods	+1
Any unit defending in a Building	+2
Any unit attacking from a Hill	-1
British unit firing from outside German target's fire zone	-1
For each other **British** unit adjacent to a German target	-1

British Orders Chart

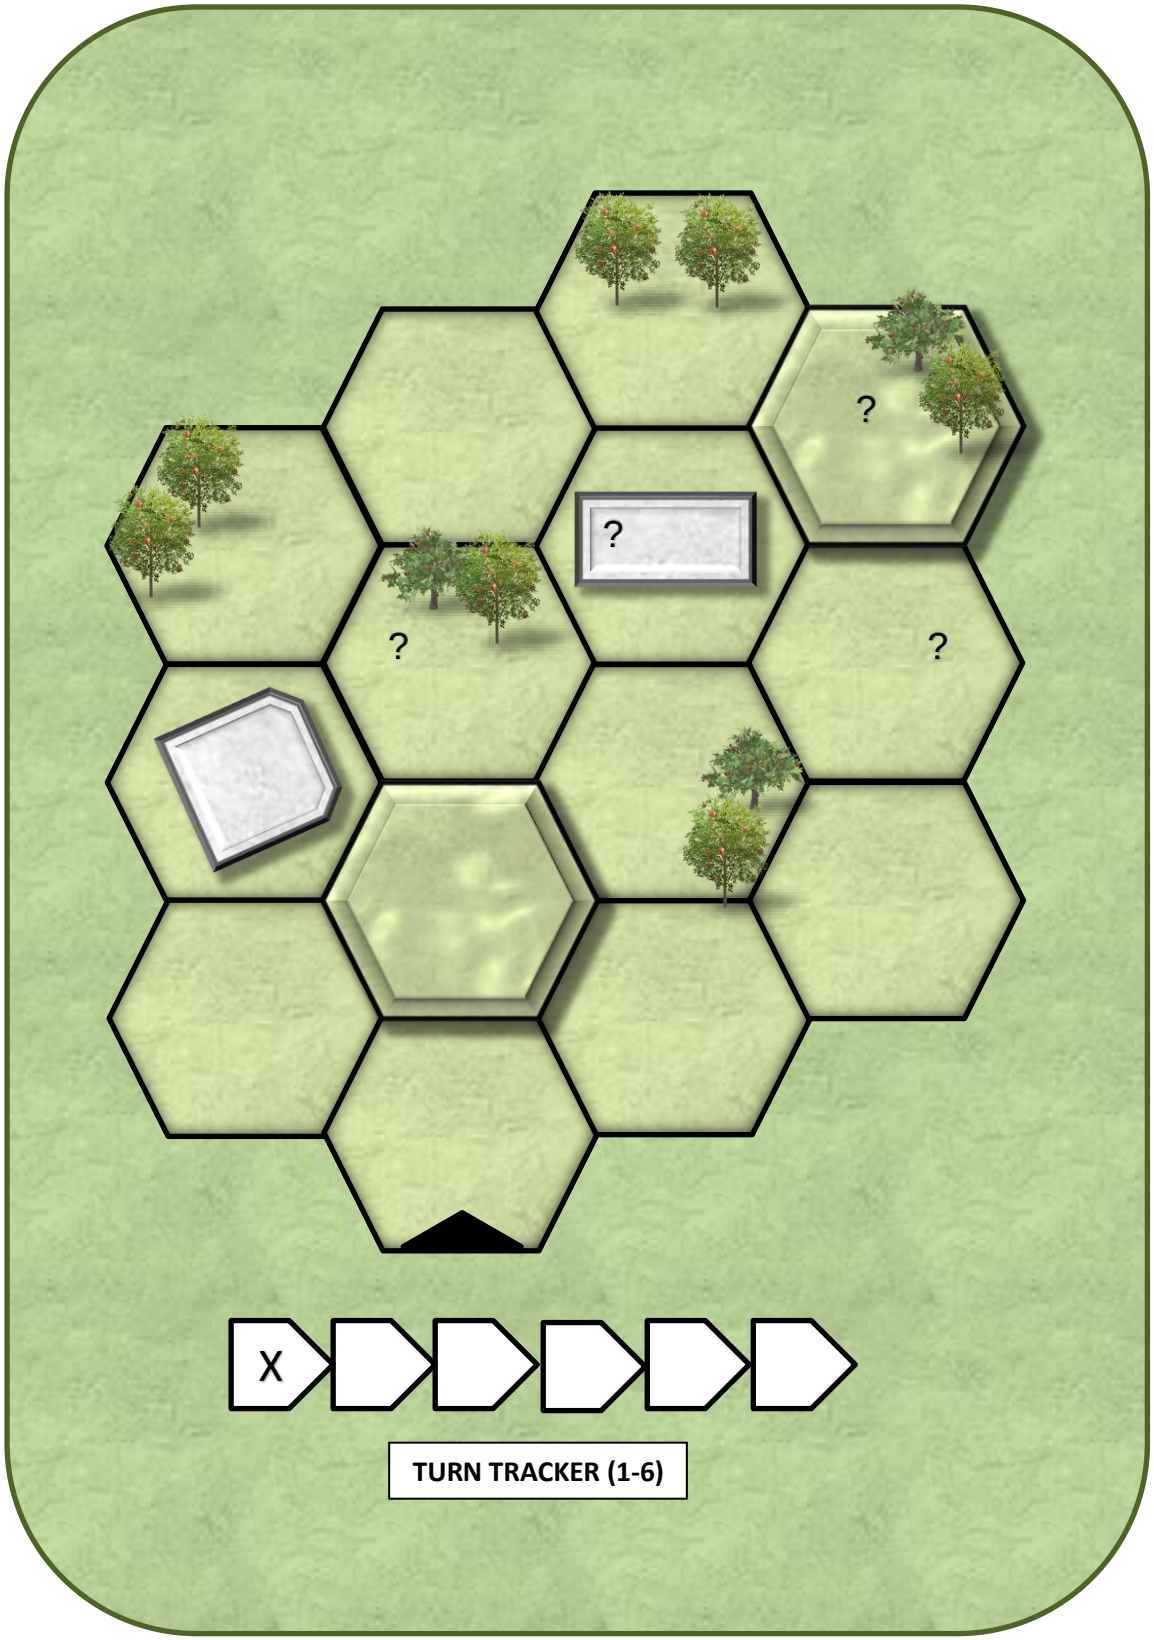
6	ADV	FIRE	FIRE	COV				

To Win: Reveal and clear all German units before time runs out.

Dan Goodpasture (Order #42211972)



Dan Goodpasture (Order #2211972)

Mission 7 – Secure the Village (1)

Note that the Half-Track (HT) is already revealed on the map. Remember, a unit's Fire Zone is the hex it is facing and the 2 hexes either side of it, so the Half-Track is covering the Woods hex to its left and the Hill hex to its right, as well as the bridge. Rivers cannot be crossed other than at bridges. Your PIAT Team will be needed to destroy the Half-Track. It is also useful against units in Buildings as it ignores the Building defence bonus.

6th Royal Scots Fusiliers		
Squad	**Weapons**	**To Hit**
Rifle Squad A	Rifles & Grenades	8+ / 6+ (no bonuses)
Rifle Squad B	Rifles & Grenades	8+ / 6+ (no bonuses)
Rifle Squad C	Rifles & Grenades	8+ / 6+ (no bonuses)
Mortar Team M	Mortar	-2 bonus if 2 hexes from Target
PIAT Team P	PIAT	7+ Half-Tracks & Buildings (no def)

d6 Roll	Enemy unit	To Hit
1	Heavy machine gun	5+
2-3	Light machine gun	6+
4-5	German Rifle Squad	8+
6	Minefield	7+ (no bonuses)
-	Half-Track	6+

Terrain or Situation	To Hit value
Any unit defending in Woods	+1
Any unit defending in a Building	+2
Any unit attacking from a Hill	-1
British unit firing from outside German target's fire zone	-1
For each other **British** unit adjacent to a German target	-1

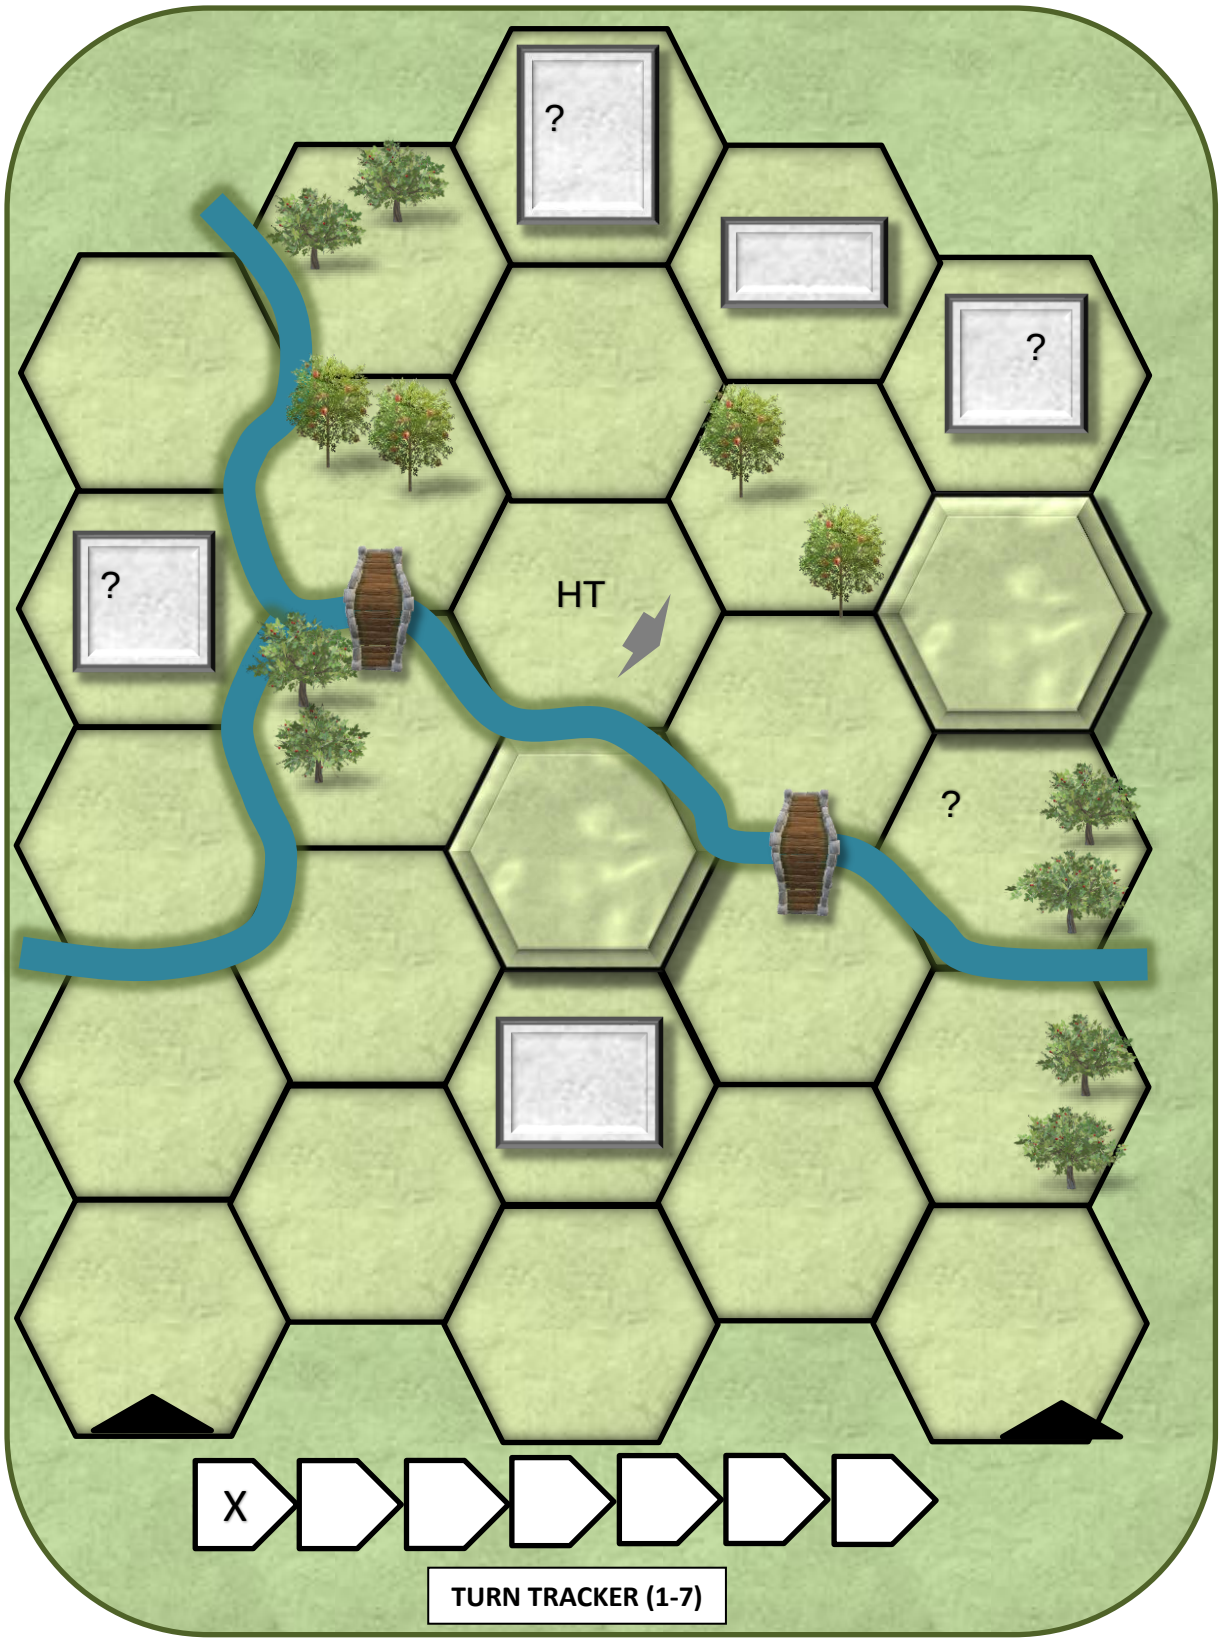
4	FIRE	COV			ADV	COV	COV	FIRE
5	FIRE	ADV			ADV	COV	FIRE	COV
6	ADV	FIRE			ADV	COV	FIRE	COV

To Win: Reveal and clear all German units before time runs out.

Dan Goodpasture (Order #42211972)



Dan Goodpasture (Order #2211972)

Mission 8 – Enter the Church

6th Royal Scots Fusiliers		
Squad	**Weapons**	**To Hit**
Rifle Squad A	Rifles & Grenades	8+ / 6+ (no bonuses)
Rifle Squad B	Rifles & Grenades	8+ / 6+ (no bonuses)
LMG Team G	Machine Gun	6+
Mortar Team M	Mortar	-2 bonus if 2 hexes from Target

d6 Roll	Enemy unit	To Hit
1	Heavy machine gun	5+
2-4	Light machine gun	6+
5	German Rifle Squad	8+
6	Minefield	7+ (no bonuses)

Terrain or Situation	To Hit value
Any unit defending in Woods	+1
Any unit defending in a Building	+2
Any unit attacking from a Hill	-1
British unit firing from outside German target's fire zone	-1
For each other **British** unit adjacent to a German target	-1

British Orders Chart								
d6	**Rifle Squad**		**MG Team**		**Mortar Team**			
1	RAL	GRE	RAL	ADV	RAL	ADV		
2	ADV	SCO	ADV	COV	RAL	ADV

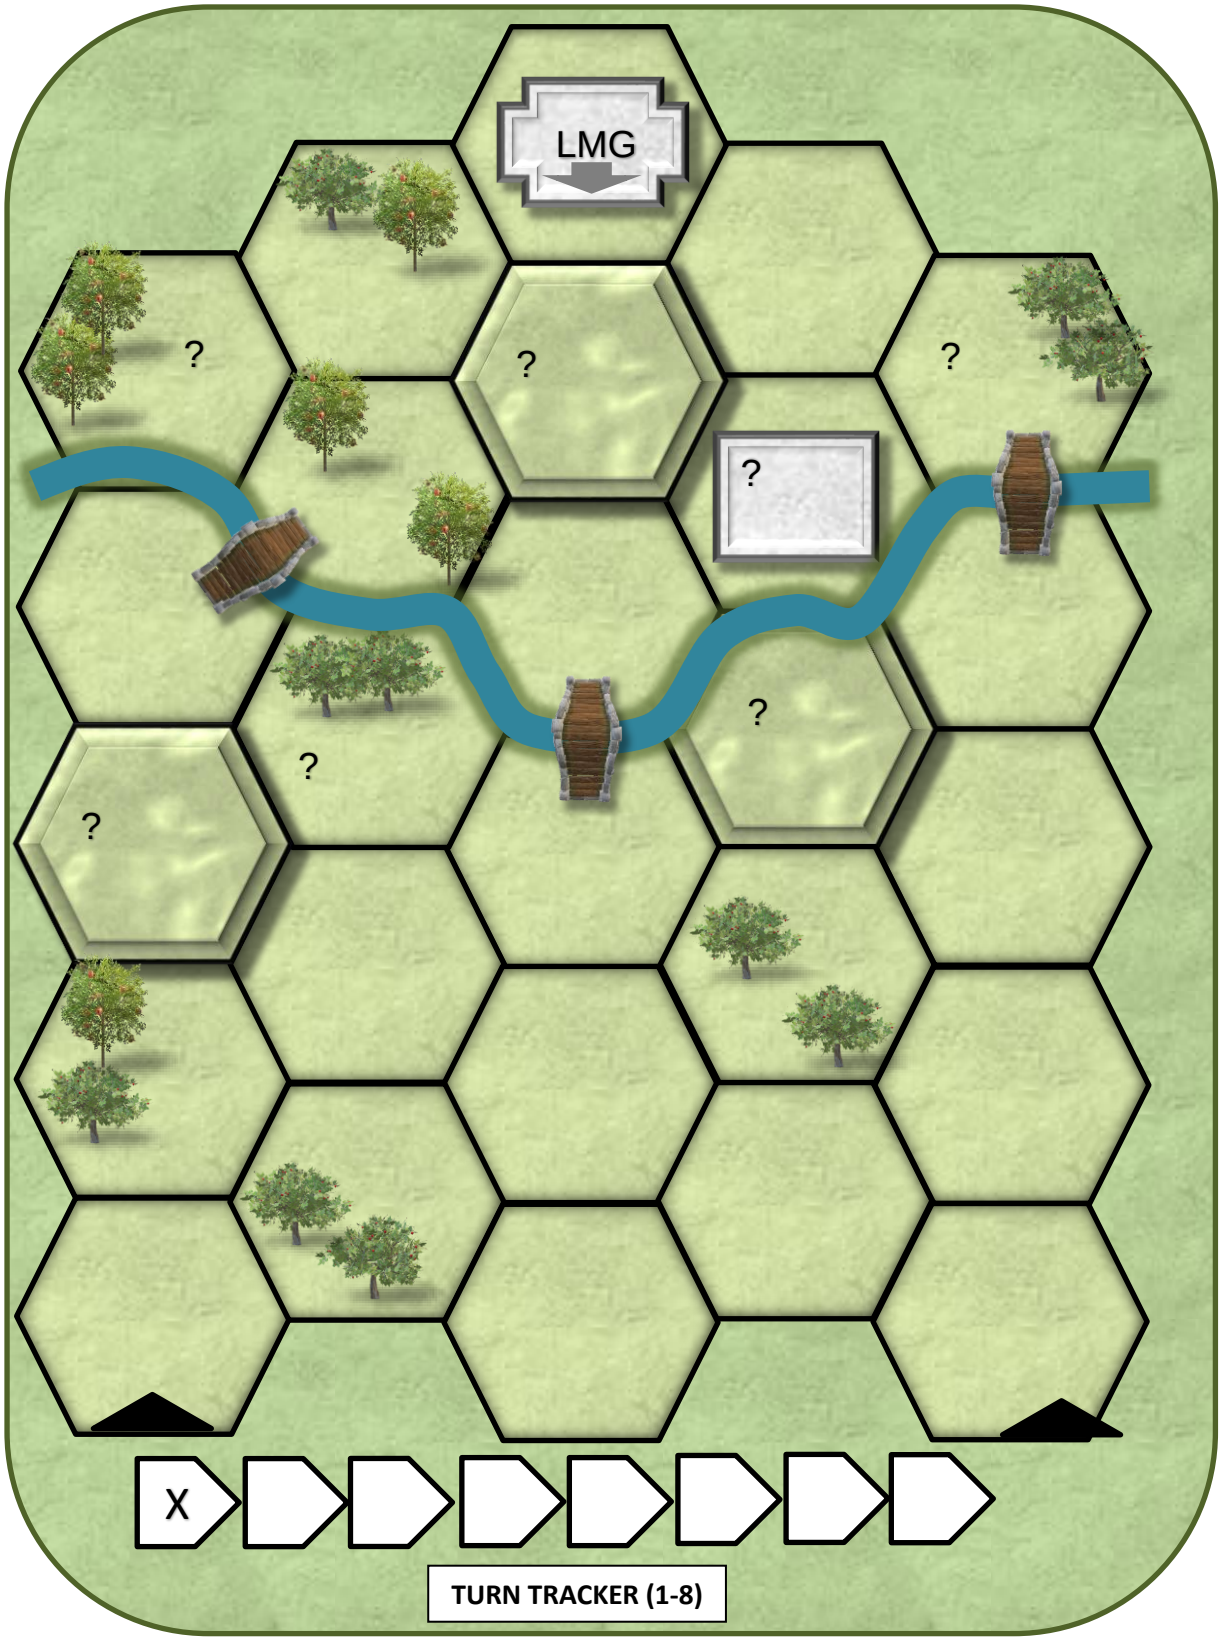
4	FIRE	COV	COV	FIRE	ADV	COV		
5	FIRE	ADV	FIRE	COV	ADV	COV		
6	ADV	FIRE	FIRE	COV	ADV	COV		

To Win: Advance any British unit onto the Church hex (the cross shaped building at the top of the map). Remember that you cannot enter a hex until it is cleared of German units.

Note: there is no specific requirement to clear the German units in this type of mission.

Dan Goodpasture (Order #42211972)



Dan Goodpasture (Order #2211972)

Mission 9 – Secure the Village (2)

Note that the Half-Track (HT) is already revealed on the map. Your PIAT Team will be needed to destroy the Half-Track. Here, the river splits the map, at least until you reach the bridge, so set up is crucial. Remember, no backward *movement* is allowed, and all German units must be cleared for this mission.

6th Royal Scots Fusiliers		
Squad	**Weapons**	**To Hit**
Rifle Squad A	Rifles & Grenades	8+ / 6+ (no bonuses)
Rifle Squad B	Rifles & Grenades	8+ / 6+ (no bonuses)
LMG Team G	Machine Gun	6+

Dan Goodpasture (Order #42211972)

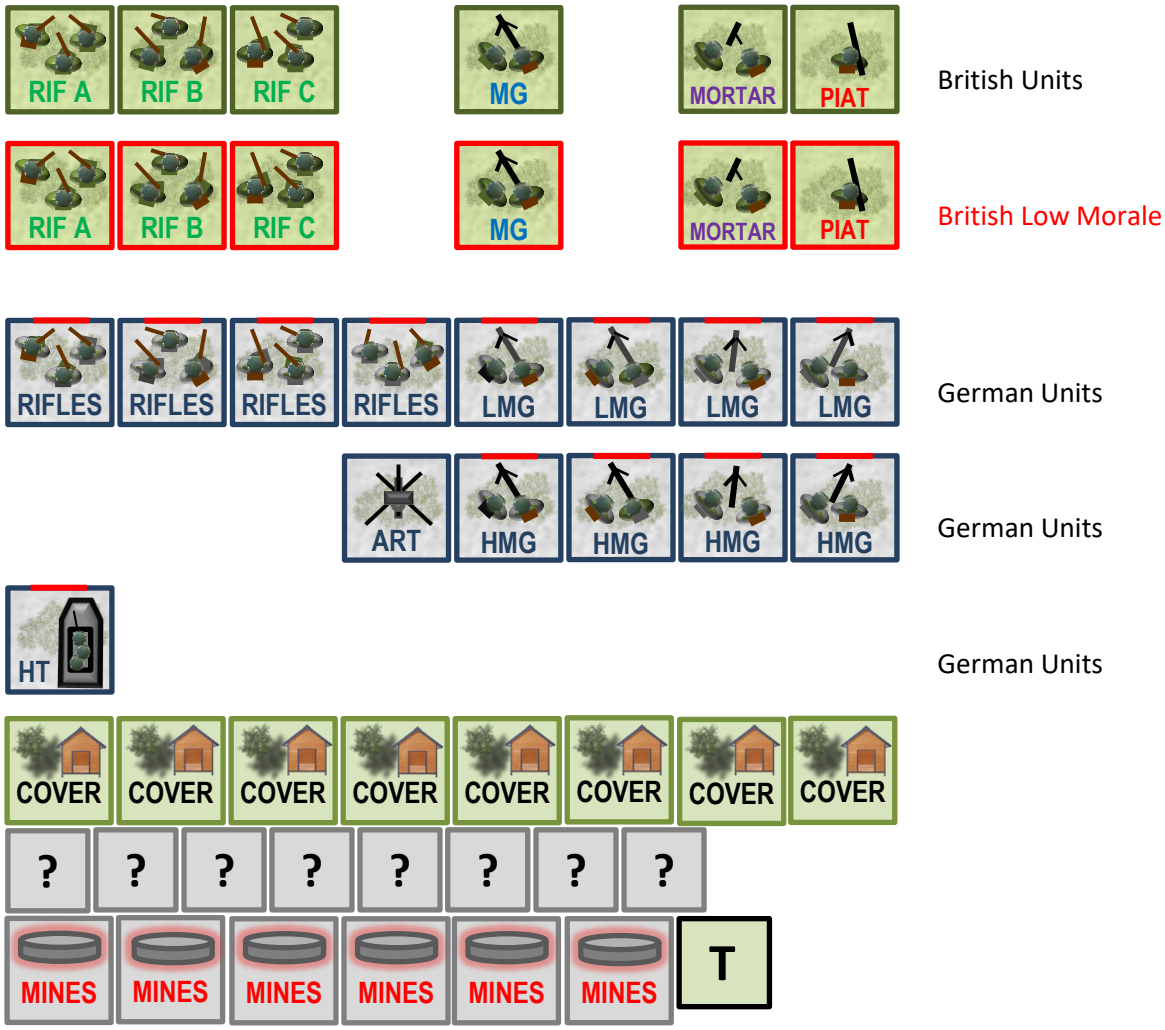
Suggested Counters

Whist not necessary, some Players might like to copy or remove this page and stick these counters onto medium card with a very thin layer of PVA glue or similar, in order to use them on the various maps. Cut them up carefully with good quality scissors or a craft knife once the glue is completely dry. Seek adult supervision if necessary. The counters are generally self-explanatory.

The 'T' counter is for the Turn Tracker. Red lines on the German units denote their Facing.



A copy of this page will also be placed in the *Files* section of 'The Fields of Normandy' game page on www.BoardGameGeek.com

Dan Goodpasture (Order #2211972)
